Summary

Final-year Computer Science student with hands-on experience building full-stack web applications and ML pipelines. Looking for a new-grad software engineering role where I can ship product features that real users use.

Experience

Software Engineering Intern — Acme Corp

Jun 2024 – Aug 2024

Built an internal dashboard in React + TypeScript used by 200+ sales reps.
Migrated a legacy Python ETL job to Airflow, cutting nightly run time by 38%.
Wrote pytest suites that took feature coverage from 41% to 78%.

Undergraduate Research Assistant — State University CS Lab

Sep 2023 – May 2024

Implemented a retrieval-augmented generation pipeline over 12k scientific abstracts.
Co-authored a workshop paper on evaluation of long-context LLM summarisation.

Education

B.S. Computer Science — State University

Expected May 2026 — GPA 3.8 / 4.0

Relevant coursework: Algorithms, Operating Systems, Databases, Distributed Systems, Machine Learning, Human-Computer Interaction.

Projects

GradTrack — React, Node.js, PostgreSQL, Docker. A degree-audit tool 400+ students use to plan remaining courses.

PaperLens — Python, FastAPI, OpenAI. RAG app that lets researchers ask questions of a paper archive.

HabitGarden — Swift, SwiftUI. iOS habit tracker with on-device streak analytics (2.1k App Store downloads).

Skills

Python, TypeScript, JavaScript, React, Node.js, FastAPI, Django, PostgreSQL, Docker, Git, pytest, scikit-learn, PyTorch, Linux, REST APIs, GraphQL, CI/CD, AWS (S3, Lambda, ECS)

Awards

Dean's List (Fall 2023, Spring 2024). HackMIT 2024 - First Place, Education Track.
